FULL TEXT

The caption of text under Table 1 that reads: "In multivariate analysis using a logistic regression model, the clinical parameters with $P < 0.20$ in univariate analyses (age, number of comorbidities, WBC counts, hemoglobin level, surgical procedure [laparoscopic vs. open surgery] and stage) were included. A backward stepwise conditional logistic regression was used with $P = 0.10$ as the entry and $P = 0.10$ as the removal criteria.

Abbreviations: OR, odds ratio; CI, confidence interval; WBC, white blood cell" should not appear with Table 1, but instead with Table 4. The formatting of Table 1 has also been updated, for improved readability.
