The information of *TREX1* and *TREX2* has been changed in NCBI data base (<http://www.ncbi.nlm.nih.gov>). Therefore, we would like to update the gene and SNP nomenclatures as in following Table 1 and Fig. 1. Our conclusion should be revised as “*ATRIP* polymorphism –455G>C showed protective effect on the production of anti-Ro Ab, and *TREX1* +696C>T in exon 1 and *ATRIP-TREX1 ht2* [G–T–C–T] showed also protective effect on the production of anti-dsDNA Ab.”

The online version of the original article can be found under doi:[10.1007/s00296-007-0509-0](https://doi.org/10.1007/s00296-007-0509-0).

A1. Map of *ATRIP/TREX1* on 3p21.3-p21.2 (23 kb)**B1. Map of *UCHL5IP/TREX2* on Xq28 (27 kb)**

Fig. 1 Gene map and haplotypes of *ATRIP/TREX1* and *UCHL5IP/TREX2* genes. Coding exons are marked by black blocks, and 5' and 3' UTRs by white blocks. The first base of the translational start site is denoted as nucleotide +1. Asterisks indicate polymorphisms genotyped in a larger population ($n = 1,053$). The frequencies of polymorphisms not subjected to larger scale genotyping were based on sequence data ($n = 24$). **A1** Polymorphisms of *ATRIP/TREX1* identified on chromosome 3p21.3-p21.2. **A2**. LD coefficients ($|D'|$ and r^2) among *ATRIP/TREX1* polymorphisms. **A3** Haplotypes of *ATRIP/TREX1* exhibiting frequencies ≥ 0.05 . Others asterisks contain rare haplotypes: CCCC, CTCC, GCCC, and CCTC. **B1** Polymorphisms of *UCHL5IP/TREX2*

A2. LDs among *ATRIP/TREX1* polymorphisms
